

Central Avenue Rebuild Glossary of Terms

Municipal Infrastructure

Includes:

- Watermains and water service pipes (up to property lines)
- Fire hydrants and valves
- Sanitary sewers, manholes, and force mains
- Wastewater lift stations

Lift Stations

These stations help move wastewater from lower to higher ground so it can reach treatment plants.

- Lift Station Replacement: Replacing the existing lift station near the Central Avenue trail crossing.
- New Lift Station: Proposed with future phase work, to be installed at the Inverness Centre for the Arts (ICCA) driveway

Active Transportation & Streetscaping

Includes:

- New sidewalks and multi-use paths
- Crosswalks, curb changes, and speed calming features
- New pedestrian lighting
- Landscaping, benches, garbage/recycling bins, and other street furniture
- Improved accessibility for walking, cycling, wheelchairs, scooters and the visually impaired

Road Reconstruction

- New pavement

Stormwater Infrastructure

- New catch basins, storm pipes, storm manholes, and culverts
- Designed to keep stormwater out of the sanitary sewer
